This game was released onto early access way to soon i cant recommend as it is now. I have just completed my first playthrough of the Westport Independent. I stayed loyal to the government, always painting the rebels as the bad guys and making sure every district adored the Loyalists. My extreme devotion cost me an employee, Frank, but I weakened the rebels' movement and remained a popular newspaper.

While the game is a bit shorter than I would have liked, I still loved this experience. I loved imagining how the people reacted to the articles, how this dystopia changed. I see a lot of replay value in this, to see how the other extreme and min-maxing would work out.

If anything, my main gripe with the game is a minor one; the achievement don't have a description after I unlock them. Minor but annoying.

If you enjoyed Papers, Please or want to see how government censorship can work out in a dark world, I highly recommend this game.. I enjoy this game. It lived up to the potential of the first game, Princess Remedy in a World of Hurt, and it was worth the wait. I highly recommend this game. You get to date characters in the game and they help you with power-ups, special attacks, etc.. The early levels are quite fun and I like how you gain skill points by completing objectives. But there's a gamebreaking bug.

The default controls are, somehow, QWERTY instead of ASDF. You can remap them- but A and W appear to be used for using your consumable powerups, and you CAN'T remap those, so you just spam them as you're moving. Honestly it's a shame, because the controls are therefore too awkward to play.. Don't bother buying this if you didn't link your Steam account in the past. If you registered from GaijinVthe main WT page, this WILL NOT show up on your actual account but rather on some crappy new Steam account.

They no longer give activation keys which you could use to redeem on the WT store page. It just gets automatically shoved onto your "new" account. Be warned so you don't waste \$30 on this.

game is really goood best of all the video juegos very mucho goode cesear chan. Awesome VR experience!. Meh, it's not a bad game but it gets boring pretty quickly.

There are 38 stages, you can complete every stage in ± 2 minutes.

Story: 4/10

Gameplay: 6/10

Music: 8/10

Graphics: 9/10. Another fun Hidden object game. A dying breath these....

TLDR: 8/10

Don't look at me like that, I don't give 9s and 10 to just any game. It has to pleasantly surprise me to get one of those.

But this game does almost everything right, so it gets a thumbs up from me.. Good old fashioned game play polished to near perfection. I've bought this game for my C64, I bought it on Itch and now I've bought it on Steam - it's that much fun!. I'm returning this game because it scared the litteral crap out of me. Scary scary SCARY! So...5 stars for being too scary to play?. I like this game, Original gameplay about it, a lot of amazing hats and easy controls.. I thought this game was pretty okay, its fun and for the price you get a lot of stages if you got a little bit of extra cash to spend and don't know what to buy i'd reccomend this!. solid tower defense, no so grind - as predecesor royal defense.

easy and quick.

I kindly like it.

6/10. An entertaining RPG that doesn't take itself too seriously.

Pros:

Plenty of gear to grind battles for

Mobs that are more efficient to grind for gold and exp: jellyfish, plants, wolves, gargoyles

Cons:

Mapping could be better in general (needless shadows, many map and transfer errors)

Crashes quite often (save regularly)

No explanation on how to use teleport stones (none work when used)
