A bit short, especially given that a lot of time is wasted waiting for those fishes to get into place. And the fact most just disappear when teleporting was a bit immersion breaking for me. But the impression of being in the game was really cool, especially when switching to a big creature (whale) or a small one (sandwich crab). US\$20 might be a bit high given the length. But if you can afford it or if you can get it for half that, definitely check it out.. I like the part were you become a fish and that time you become a fish. Another great moment playing a Double Fine productions. They nailed it with this first VR game. The Psychonauts universe really made sense for this trip into people's mind. You will find all the details that made the first game so exciting: the powers, the humor, the smart ideas, some puzzles and a great music. There is a real story connected to the first game. It is actually nice that you don't really have to move in the environment but just enter minds. If you liked Psychonauts, don't hesitate and join Raz and the team for this great adventure.. Good story. Good characters. Good game.. It's a fairly short game and by the end you still end up wanting more.. Doesn't support steam vr for windows mixed reality, and it should! at a guess it would take devs about ten minutes to reset the position as based on the innital position of the headset. As it stands you just get a message about being out of game bounds.
